

RinkMusic™ RMC-1000 System

SKATER INFO

RMP-1000 CONTROL PANEL

RMC-1000 MAIN SYSTEM CPU and RMT-1000 KEY TAGS
(shown with optional touch screen)

The RinkMusic™ system was developed to provide a convenient way for skaters to transport, play and control their music programs without the cumbersome task of using cassettes or CDs.

As you know, cassettes, on many occasions get damaged or are "eaten" by the cassette player. The CD, on the other hand, tends to get scratched and therefore unplayable and certainly from time to time there is no one to play the music at the arena.

With this new technology, music is stored digitally on the RinkMusic™ system. The music is given to the rink via a CD or cassette, and is uploaded. When a RinkMusic™ Key is presented to the Key Reader, the music program will be loaded for play. If another music program is currently playing, the new music program will be placed in the music queue. The skater's name will be announced alerting them that their music is about to play. This is all done automatically starting with the swipe of a RinkMusic™ Key.

Benefits

With the RinkMusic™ System:

- you will know which skater you follow so you can get ready to start your program.
- you won't need help playing your music.
- you won't have to run around at the end of the session looking for your tapes or CDs.
- no more ruined or lost tapes or CDs.

Features

- The use of a RinkMusic™ Key allows you to play any of your stored music programs.
- Automatic music program queuing.
- Automatic volume control.
- Fast forward and rewind in 10 second increments.
- Position in the queue is announced at the control panel when your RinkMusic™ Key is presented.
